

# Robotics

Maharishi School is offering our students the opportunity to participate in a range of exciting after-school activities. One of these is our new Robotics Program, as part of our new Homework Club.

Headed by our science teacher, the Robotics Program is “so much fun!” It is designed to teach children the basics of coding with fun and creativity. Easy-to-use and engaging resources encourage hands-on play and problem-solving strategies. Students learn how to use an iPad to program robots to move, turn, avoid obstacles and make sounds. As well as challenging students, the program aims to ensure students stay up to date with advancing technologies and systems.

The after-school programs enhance students’ experiences and participation in school life.
